EXPERIENCE

SDE-1 Backend

Osfin

September 2025 – present

Bangalore, India

- Built rollback flows across ingestion and reconciliation stages to revert ingested data and restore impacted reconciled records, storing rollback summaries for auditability and traceability.
- Implemented Quartz Scheduler trigger management for reconciliation batch jobs, creating and removing triggers as jobs are enabled or disabled to keep scheduling in sync with configuration.
- Developed a multi-channel notification module supporting Email, Slack, UI, and SMS using MessageChannel, decoupling delivery from business logic.
- Led modularization of the authentication module into an independent, reusable component, reducing coupling across services.
- Developed an “Alert Run Now” feature to preview a sample of configured alert emails before activation.
- Contributed to Config as Code for version-controlled, reproducible service configurations.
- Handled on-call rotations — triaged production issues, drove RCAs, and shipped fixes to prevent recurrence.

SDE

Vegrow

June 2024 – August 2025

Bangalore, India

- Developed APIs and views in Ruby on Rails to manage supply chain operations.
- Built a Golang microservice to generate, send, and track OTPs sent through Kaleyra.
- Optimized API performance in Ruby on Rails, reducing response times by 60%.
- Upgraded Ruby on Rails 6.0 → 7.1 and Ruby 2.7 → 3.3, improving performance and compatibility.
- Reduced unit test runtime by 50% by implementing parallel execution for unit tests.

SDE Intern

Vegrow

January 2024 – May 2024

Bangalore, India

- Implemented a bastion host, enhancing security by restricting direct access and providing 100% controlled interactions with services.
- Contributed to increasing unit test coverage for a critical Ruby on Rails application from 8% to 90% using RSpec, as part of a team of 5, significantly enhancing code quality, reliability, and maintainability.
- Established centralized logging for all backend services using New Relic, reducing log retrieval time by 60% and enhancing debugging efficiency.

EDUCATION

Velagapudi Ramakrishna Siddhartha Engineering College, Vijayawada

Bachelor of Technology in Computer Science

CGPA - 9.05

January 2021 – April 2024

TECHNICAL SKILLS

Languages: Java, JavaScript, Golang, SQL

Frameworks and Libraries: Spring Boot, Spring Batch, Spring Data JPA, Spring Security, Spring Integration, Spring Cloud, Hibernate, Quartz Scheduler, Ruby on Rails

Developer Tools: Git, Docker, GitHub Actions, Kubernetes, AWS, Jenkins

ACHIEVEMENTS

- Earned the Knight badge (max. rating - 1945) on LeetCode, placing in the top 4% of users globally.
- Secured Rank 663 out of 21,511 participants (top 3%) in LeetCode Biweekly Contest 156.
